

I am going to be visiting Eureka!.

You may feel.

About visiting Eureka!.

That is ok!

Here is a social story to help you feel more comfortable.

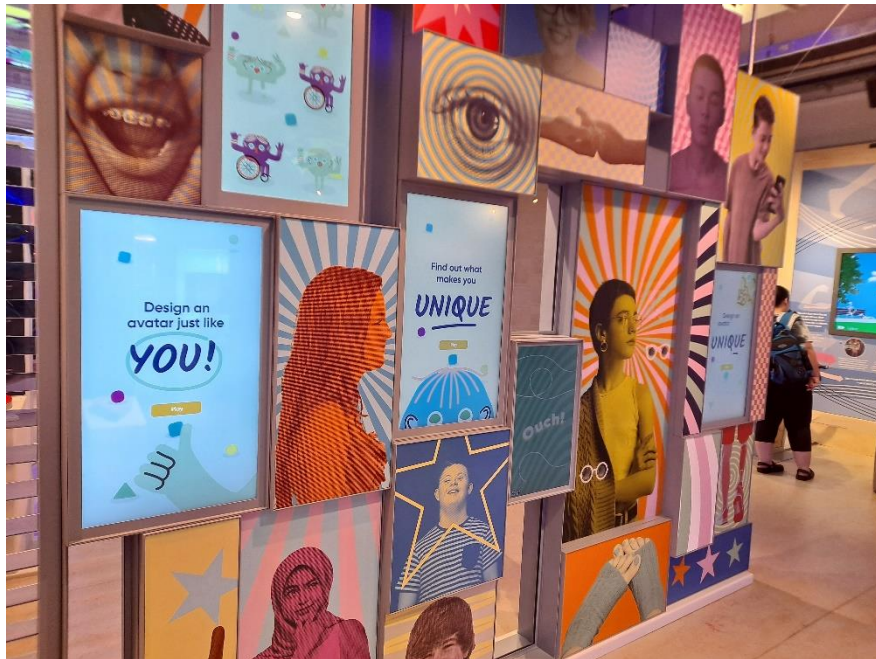

Welcome to Eureka!  
Science & Discovery,  
where you will learn how  
Science, Technology,  
Engineering, Arts and  
Mathematics are a part  
of everyday life.

There are 5 areas for you  
to discover!

**Bodies:** Ever walked through a pair of lungs, or seen a supersize brain?

Your body is unique, one of a kind – test it, embellish it, look after it.

**Homes:** Think differently about the things you see and use every day! What are things for, why is it made like that, how does it work, would I do it differently?

**Nature:** What does our environment teach us about ourselves, our purpose, and our connections to each other?

**The Burrow:** Playful opportunities to interact with nature-themed exhibits and activities, and a fantastic imagination playground

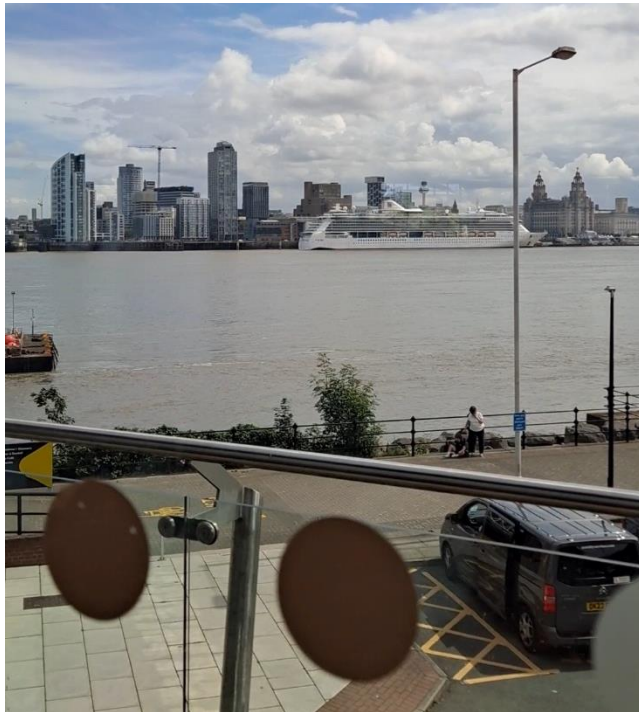

**Make Create:** Tinker, invent, make, create: The clue's in the name...

There is a café if you get hungry.

Alternatively, you can bring your own food areas both indoors and outdoors, with views of the river Mersey!

During the event you may see Harley, our friendly photographer photographing the event.

We hope you have a  
fantastic time at our  
event.

The A World UK Team.
